MASTER IN INTERNATIONAL SECURITY
STUDIES

PROGRAM STRUCTURE

FACULTY OF SOCIAL SCIENCES

Charles University

AS WE ARE WAKING to a world of ever-present and all-permeating security issues, the discipline has seen an unprecedented growth of real-world relevance. More than ever, it's necessary to recognize and critically assess a variety of traditional and non-traditional threats and their interconnected nature. To achieve the connection between the old and new, the program offers an interdisciplinary course structure.

TWO-YEAR MASTER'S DEGREE PROGRAM provides students with a complex guide through security, conflict, strategic studies, and intelligence. Responding to the pressing agendas of the current security environment the program is administered by the team of young scholars of the Department of Security Studies.

STUDENTS WILL OBTAIN theoretical and methodological training allowing them to address security issues that range from conventional conflicts and wars to unconventional agendas associated with virtual or space domains.

THE PROGRAM FOSTERS a stimulating, intellectual exchange between students and faculty which is the necessary ingredient of a successful graduate program. We believe that the invigorating environment echoing the seven centuries of scholarly tradition, together with the collegial atmosphere of our graduate students, creates a very rewarding experience on multiple levels - personal, academic, and professional.

GRADUATES CAN PURSUE CAREERS in security-related posts in government and public administration, intelligence agencies, international organizations, non-governmental sectors, and transnational corporations. Finally, the training also provides a sound basis for doctoral studies.
